

## PROBLEM

Clinical competencies are the specific skills needed every day in patient care. Most healthcare professionals will use some form of competency in their practice, and most patients staying in hospital will require them. However, almost everything about learning, assessing and revalidating these skills is managed on paper. Inconsistent and repeated paper competency assessments are demoralising for staff, limit professional development, and may ultimately lead to poor retention.

Gaps and unwarranted variance in competence can put patient safety at risk and leave management in the dark on the skills and potential of their workforce.

“The DigitalHealth.London Accelerator has helped us understand the most important challenges in the NHS and the wider healthcare environment, and how we can best support them through developing and implementing Compassly. It’s connected us to experts from the NHS and beyond, and it’s been fantastic to be part of great cohort of supportive peers.”

## SUCCESSES AND IMPACT

- Through a ground-breaking collaboration, the UKONS System Anti-Cancer Therapy Competency Passport (used by the majority of NHS and private chemotherapy nurses) is being developed to launch across the whole of the UK on Compassly in 2023.
- Based on clinical user feedback, the team built and launched v2.0 of Compassly, with the features their users were most passionate about – renewal and expiry, deadlines and reminders and beautiful PDF digital competency certificates.
- They are now planning their first NHS group model implementation, to bring consistent digital competency assessments and seamless passporting of skills across multiple NHS Trusts in a group.

**> 1000**  
users use Compassly at  
Kettering  
General Hospital

**5000**  
oncology nurses will  
have access to the  
UKONS SACT Passport  
on Compassly

**100**  
different competencies available

## SOLUTION

Compassly allows hospitals to easily assess and track clinical competencies on a simple but powerful mobile application. It frees up time to care for nurses and provides vital assurance reporting. It supports system-working and co-ordination across organisations, bringing best practice to all and avoiding wasteful re-proving of skills.

“We’re so excited and pleased about this vital piece of work to ensure better & easier access to the UKONS Systemic Anti-Cancer Therapy passport!”  
*Board Member, UK Oncology Nursing Society*

## WHAT’S NEXT?

Rolling out the UKONS SACT passport on Compassly across the UK in 2023 will bring digital competency passports and skills assessments to more than 5,000 oncology nurses and support their vital work in caring for cancer patients.
